Minutes of Meet

Date: 25 Jan 2024

1. Finalised the database design for *applications table*.

2. Enquired about uploading of documents like resume and educational and identity documents.

3. Discussed the tech stack to use. Decided upon ReactJS for front-end and ExpressJS for backend. MongoDB will be used for database management.

4. Understood the workflow of the project properly.

5. Next meet was shifted out of schedule due to quizzes.

6. Set targets for the next meeting.

Actionable plans: Implementation of the application form. It should be functional with both front-end and backend parts. Also produce the database design for positions

Next meet on 5th Feb
